

Showcasing e-Assessment Opportunities Worldwide

The take up of e-Assessment is increasing world-wide. Educators, trainers, Government Agencies and test providers are actively engaged in developing technology based assessment solutions that enable them to provide reliable, flexible assessment for students and employees.

Assessment Tomorrow is one of the leading international organisers of conferences and seminars in the field of e-Assessment. Drawing on expertise from the UK, Europe and worldwide, it organises conferences and seminars aimed at providing policy makers, assessment developers and people implementing e-Assessment in schools, colleges and training providers with the opportunity to debate the issues and find out about the latest developments.

To date, conferences have been run in London, Manchester, Birmingham, Glasgow, Dublin, Kuala Lumpur and Hong Kong. Between 2006 and 2009, further conferences are planned for London, Dublin, Kuala Lumpur, Bangalore, Singapore, Delhi, Dubai and Chicago. Each conference has its own theme, aimed at a particular aspect of the market or the development needs of the region. Example programmes and other details from our conferences in London, KL, Bangalore Dublin and Hong Kong are available from the website www.assessmenttomorrow.com

The conferences provide opportunities for e-Assessment organisations to sponsor and exhibit as well as provide speakers and the opportunity to present to audiences which will include key purchasers and users of assessment systems. Assessment Tomorrow will also tailor design seminars for individual companies. Be it a series of breakfast meetings or a one day seminar, Assessment Tomorrow will organise, promote and manage events aimed at particular groups of clients or for the launch of new products and services.

Working with experienced professionals, Assessment Tomorrow can provide e-Assessment project consultancy. It can access a range of services including assessment design, assessment delivery systems, design services and system evaluation.

For more details, contact Jeff Ross or Martyn Roads. We look forward to talking to you.
